# Introducing TryByte

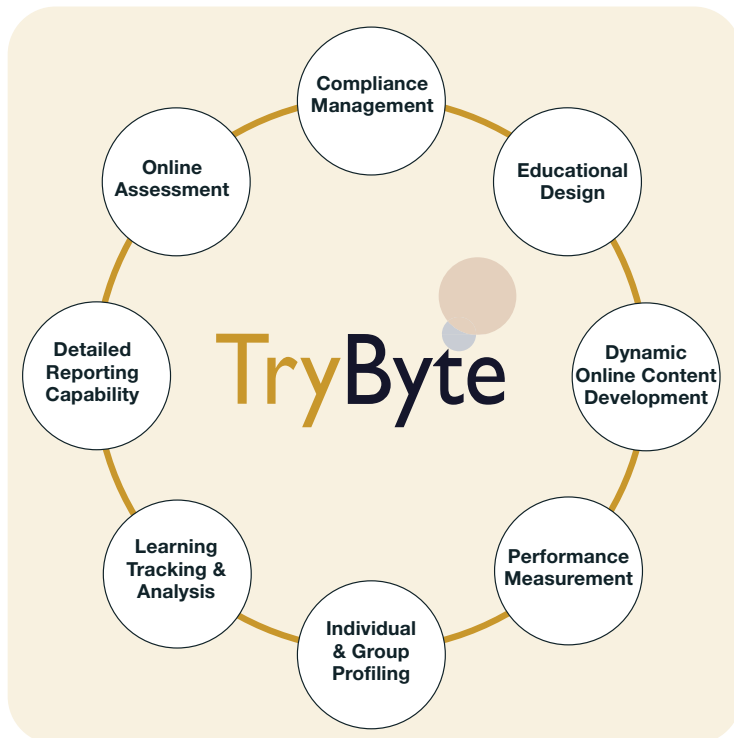

**TryByte are specialists in aviation regulatory training, consulting within commercial aviation, government regulatory agencies and air navigation service providers.**

We create all supporting material in-house including; regulatory compliant website's and document portals, promotional videos, online training, advertising and reference materials.

We are particularly skilled at working with a company's subject matter experts to produce the best possible training to meet organisational and regulatory requirements.

TryByte operates internationally and has clients in Europe, North America, Africa and Australasia.

## TryByte Online Training Features

# Online Security Training

e-learning is for delivering online, hybrid and synchronised learning regardless of physical location, time of day, or choice of digital reception/distribution device. CD-ROM and DVD can be used to provide learning materials either stand alone or in conjunction with the internet/intranet.

## Calculating the cost savings associated with TryByte e-learning

Cost savings such as expense, turnover, productivity etc., vary substantially from one organisation to another. This is due in part to the variation in the needs of the organisation and how it handles its education today.

It is important to note that there is no one correct way to calculate Return on Investment (ROI). Formulas such as Net Benefit, Benefit Cost Ratio (BCR) and ROI % are but a few examples. Also keep in mind that not all calculated cost savings are transferred to the bottom line.

## TryByte e-learning solution could result in cost savings in

- Reduced training expense
- Reduced staffing expense
- Reduction in training time
- Reduction of costs for printing educational materials
- Improved staff performance
- Increased consistency of training materials
- Increased utilisation of existing hardware
- Reduction in fines and penalties from the numerous regulatory agencies

Up to  
**80% SAVINGS**  
in training costs!

we offer

**TryByte online General Security Awareness Training (GSAT) is UK DfT approved. Our Content is the same as you would get in our face to face presentation, infact, our DfT approved trainers can use the TryByte LMS system to deliver this exact course to students wishing to renew their existing GSAT training or train new employees requiring the GSAT certification.**

For further information about our GSAT course [click here](#)

To visit our website [click here](#)

You can book our GSAT course online via the TryByte website. [click here](#)
